

This is the
private key.

Like a **password or PIN**,
keep it safe and secret.

It is needed for sending
coins to other wallets.

This is the
public address.

Use it to check the balance.

Like an **account number**,
share it with anyone
to receive coins.

bitcoin paper wallet

private key folded inside!

To **use this wallet**, import
the private key into a
bitcoin client.

The easiest way is to use an
online wallet, like:

- **blockchain.info/wallet**
- **strongcoin.com**

The more secure method is
using a desktop client, like:

- **official bitcoin client**
from **bitcoin.com**
- **Armory**
from **bitcoinarmory.com**
